

LAB 06

PH142 Fall 2026

Announcements

- **Lab06:** due Sat 10/10 at 11:59 AM (noon)
- **Quiz05:** due Fri 10/9 at 11:59 PM (midnight)

Week 7 Lecture Review

Distributions

- *Distributions* are used to model patterns in data
- We will cover three distributions:
 - Normal
 - Binomial
 - Poisson
- Based on what we know about the data's underlying distribution, we can calculate the mean, variance/SD, and probabilities

Week 7 Lecture Review

The Normal Distribution

The Normal distribution is a bell-shaped, symmetric distribution, with notation $\mathbf{X} \sim \mathbf{N}(\mu, \sigma)$

- μ = mean
- σ = standard deviation

R Functions:

- `pnorm()` → outputs the probability of value x or below
- `rnorm()` → generates random draws from the distribution
- `qnorm()` → outputs a quantile

Week 7 Lecture Review

The Normal Distribution

Week 7 Lecture Review

The Binomial Distribution

The Binomial distribution models discrete random variables (only whole numbers), with notation $\mathbf{X \sim Binom}(n, p)$

- n = total number of “trials”
- p = probability of success

R Functions:

- `pbinom()` → outputs the probability of value x or below
- `dbinom()` → outputs the probability of x successes exactly
- `rbinom()` → generates random draws from the distribution

Week 7 Lecture Review

The Binomial Distribution

Week 7 Lecture Review

The Poisson Distribution

A Poisson distribution describes the number of event occurrences in fixed, finite intervals of time or space, with notation **$X \sim \text{Pois}(\lambda)$**

- λ = the average number of events in an interval

R Functions:

- `ppois()` → outputs the probability of value x or below
- `dpois()` → outputs the probability of x events exactly
- `rpois()` → generates random draws from the distribution

LAB 06 Walkthrough

Lab Submission

- Follow the directions on the LAB06 file
- Submit using the **Terminal Tab** (next to the console in the bottom left pane)
 - Copy and paste the given line into the terminal
 - Follow prompts (NOTE: the terminal will **not** show your password being typed out!)
- **CHECK IN GRADESCOPE THAT ALL YOUR TESTS PASSED**
